Objective

Computer Science Engineering student with strong foundations in Java, Python, Data Structures, Algorithms, and Full-Stack Development. Experienced in building scalable web applications, RESTful APIs, and AI-powered automation systems. Passionate about solving complex engineering problems, designing efficient software systems, and leveraging cloud technologies and data-driven insights in financial and enterprise environments.

Experience

Full Stack Web Developer Intern

Jun 2026 – Present

TENJIKU INNOVATIONS PRIVATE LIMITED

- Developing and maintaining full-stack web applications using **Next.js, React, TypeScript, Node.js, Express.js, MongoDB, and Tailwind CSS**.
- Building responsive and reusable UI components while ensuring cross-browser compatibility and mobile responsiveness.
- Optimizing application performance through client-side caching, pagination, and efficient API integration.
- Collaborating with senior developers using Git workflows, participating in code reviews, and implementing feature enhancements.
- Designing and consuming RESTful APIs, troubleshooting production issues, and improving overall user experience.

Projects

Gen AI Interview Preparation System — MERN Stack + Gen AI [Live Demo](#)

Apr 2026 - May 2026

- Developed an AI-driven platform to analyze resumes and job descriptions and identify skill gaps.
- Generated personalized interview preparation plans and technical question sets.
- Designed secure REST APIs using JWT authentication and scalable backend architecture.
- Applied prompt engineering techniques and automation workflows to improve user outcomes.

CloudWare – Hierarchical File Management System — MERN Stack [Live Demo](#)

Feb 2026 – Mar 2026

- Built a full-stack cloud storage application inspired by Google Drive with secure user authentication.
- Implemented hierarchical folder management with support for nested folders and file organization.
- Designed MongoDB schemas and REST APIs for efficient file and folder operations.
- Developed responsive React-based user interfaces and optimized backend performance for scalability.
- Applied recursive data structures and parent-child relationships to manage complex folder hierarchies.

Skills

Languages: Java, JavaScript, Python, SQL

Core CS: Data Structures & Algorithms, OOP, DBMS, OS, Computer Networks

Technologies: React.js, Next.js, Node.js, Express.js, REST APIs

Databases: MySQL, MongoDB, Redis, PostgreSQL

Tools: GitHub, Postman, MongoDB Atlas, Vercel, Render

AI & Automation: LLMs, Prompt Engineering, LangChain, n8n Workflows

Education

Chandigarh University, Chandigarh

Aug 2022 – May 2026

B.E. in Computer Science and Engineering

CGPA: 7.59

GGMSSS 18-C, Chandigarh

Apr 2020 – Mar 2022

Intermediate (CBSE)

87%

Certifications

- IBM (Coursera) – Java Full Stack Developer
- NPTEL (IIT Kanpur) – Cloud Computing
- Metacrafter – Blockchain Technology (Ethereum & Polygon)

Relevant Coursework

Data Structures & Algorithms, Database Management Systems, Object-Oriented Programming, Operating Systems, Computer Networks, Software Engineering, Cloud Computing
